

# Get the FlashTiming Advantage

## Raise your camera above the crowd—with a camera stand from FlashTiming.

The **FlashTiming Camera Stand** positions the camera **13 feet above the ground** to provide a clear view of all racing lanes.

Mounting the camera and storing the stand are **easy** due to our light weight aluminum telescoping poles—and, a **built-in level** and adjustable feet make it easy to position the camera in plane of finish line, ensuring a true vertical stand.

- Solid steel base weighs 135 lbs.
- Adjustable feet make it easy to level.
- Rugged wheels ensure easy moving.
- Additional camera mounts are available to stack multiple cameras.
- Optional bar-bell weight adapters are available for extra ballast in windy conditions.
- Unique custom tool is included for all adjustments on camera stand. It attaches to base for easy access and storage.

There's more!

*One person can easily move and setup the camera stand.*

# Cameras and accessories from FlashTiming

## FlashTiming Camera

This high resolution Sony Color Video Camera shows a clear image of finish line. It automatically adjusts settings to the changing conditions on your track:

- Automatically adjusts white balance to adapt to changing light conditions.
- Automatically compensates for unwanted backlighting to make athletes more visible.
- Automatically adjusts exposure time as the image brightness changes.

A Tamron 2.8 – 12mm auto-iris zoom lens accommodates camera positioning 5-35 ft from finish line. Our camera comes with the lens, a 25 foot video/power cable and power supply.

## Optional FlashTiming Camera Cover

Protects the camera from all types of weather. The cover comes with a heater and blower to ensure a clear picture.

## Video/Power Cables

We can provide additional cabling to suit the needs of your track. We provide video or video/power cable combination in custom lengths with connectors that attach directly to your camera and timing device.

## FinishLynx Accessories

### FinishLynx Camera Cover

Safeguard your FAT investment from the weather with this powder coated aluminum housing. The protected covering accommodates both the FinishLynx camera and the FinishLynx remote controlled positioning platform.

### FinishLynx Accessory Box

Our weather resistant, metal Accessory Box attaches to the camera pole and is handy for storing your FinishLynx interface hardware.
