

Get the FlashTiming Advantage

FT-Display Mobile for Track and much more!

FT-Display Mobile is full of features never before seen in a single display.

- **FT-DISPLAY MOBILE** integrates with FlashTiming's FT-FAT systems to display the race time and unofficial winning time.
- Multiple displays can be placed anywhere in the stadium. The displays are battery powered: no need for power or wires!
- They are radio controlled by the official capturing the photo finish video and/or a track official on the field with a *smart phone or tablet*.

Race Clock starts automatically with the gun blast.

Winning time can be displayed. Arm the optional Photo Beam or use FlashTiming's bookmark feature to show the winning time.

Lap number can be displayed along with race time at the common finish. The built in buzzer can be used as the bell lap.

Lap or Split times can be displayed. Show split times for distance runners or lap times for relay races.

Field Results can be displayed. Set up the display next to any throwing or jumping event and use as a performance board.

FT-Display Mobile is versatile and portable.

Use it in the gym or on the field as a scoreboard or game clock. It can be used for all sports and is ideal on the practice field.

Coaches, timing and scoring officials can control the display with a laptop, tablet or smart phone.

More on the back

The display can be configured in any of the following modes:

■ **PERIOD CLOCK:** FT-Display Mobile can display a period counter and count down timer to keep track of your workouts. Set the buzzer to sound at the end of each period to keep your workouts on schedule. Automated starts with interim periods can be programmed.

■ **STOPWATCH OR TIMER:** Use it as stopwatch or timer as your athletes workout around the track.

■ **SPEED AND AGILITY TESTING:** Use the optional Touch Pad and Photo Beam to time the 40 yard dash, 5-10-5 Shuttle, custom drills or show sprinter's time out of the blocks.

■ **INTERVAL TRAINING:** Configure the display to sound alerts at set intervals for pacing workouts (e.g. every 50M). The display can be set up for repetitive workouts with the pace increasing on each consecutive run (e.g. decreasing 200's).

■ **CROSS COUNTRY:** Set the display along the race course. After the race starts, transfer race time to each display with a smart phone. Our unique cross country feature allows you to simultaneously display the distance, the current race time and the projected finish time!

PERIOD CLOCK

CROSS COUNTRY CLOCK

FT-Display Mobile is full featured and ideal for schools on a tight budget.

- Controlled with your laptop, tablet, smartphone or FT-FAT radio
- 6" LED letters with brightness control
- 16X96 pixels at 10mm pitch, readable from 300ft
